M6 Free-to-Air

Over the first nine months of 2007, M6 FTA revenues were up 3.4%, with +3.7% for M6 channel advertising sales.

As of September 30 2007, the gross advertising market share reached 24.2%, i.e. a 1 pt gain vs. the same period last year (source : TNS MI).

Despite the increased level of TV advertising expenditures of the FMCG sectors, and the new contribution of the retail sector, the advertising market remained penalised over the first nine months of 2007 by the sharp decline of both the Telco and the Publishing sectors.

Since the beginning of 2007, M6 channel audiences performed well in the strategic time slots : M6 is the only national channel to increase

its ratings in Prime Time, with 100 000 additional viewers, thus reaching a daily average of 3.5 million viewers. 103 Prime Time attracted more than 4 million viewers (as of 30 Sept'), vs. 85 over the same period in 2006 (source : Médiamétrie).

Digital channels

On the first nine months of 2007, digital channels revenues were up 30.9%, of which +54.8% for advertising revenues.

W9 confirms month after month its leadership on DTT.

In September 2007, the channel achieved a 3.6% audience share on DTT (4 y.o), and

passed the 1% national audience share threshold (4 y.o, TV equipped), just more than two years after its launch.

Diversification and audiovisual rights

On the first nine months of 2007, diversification and audiovisual rights activities posted a **7% increase in revenues**, notably driven by the Distance Selling branch (HSS and Mistergooddeal.com), with sales up 22.6%. The Interactions branch is still penalised by the decline of some publishing and musical activities.
