In an ever-more competitive environment, M6 audience performance is a key differentiation factor. September and October were especially successful for the channel on strategic time slots, with :

- just before Prime Time, the successful launch, since September 7th, of the news programme *19.45*, attracting 2.4 million viewers on average, a 20% increase compared to the previous *6 Minutes* news format ;
- in Prime Time, many programmes and formats of the channel proved to be ever-more popular.

In September and October, M6 thus stood as the only incumbent channel to increase its ratings, with an 11.2% average audience share (vs. 11.0% in Sept-Oct' 2008, 4 years and over), thereby proving its performing programming strategy and enabling new market shares gains . *Source : Mediamat – Médiamétrie*

Change in the financial situation and outlook

The M6 Group continued its efforts aiming at optimising its cash generation. The net cash position amounted to €28.6 million on 30 September 2009, compared to €2.1 million on 30 September 2008.

In this difficult economic environment, M6 Group's strategy once gain proved its efficiency :

- on the one hand, by achieving the best performance on the television segment (best resilience of incumbent channels for M6, highest ratings increase of French channels for W9,)
- on the other hand, by the steady growth of its diversification revenue, thus offsetting the cyclical downturn in the advertising market.

If the third quarter marked an improvement in the TV advertising market, it is however necessary to remain cautious and to wait for the confirmation of a recovery before taking the trends observed at the end of 2009 as an indication for 2010.
